### WINTER BENEFITS

During winter, heat is reflected back into the room, requiring less heating to maintain a comfortable environment and save energy.

## The ultimate in energy-efficient window film from Solar Gard

This state of the art Low Emissivity (often referred to as Low-E) film offers year round energy savings and comfort through its combination of superior solar control properties and unique coating.

Applied internally to glass, together these advanced technologies keep the sun and ambient heat out in summer, while the special Low-E coating for winter works to reflect the radiant heat back into the room.

Ultimately you'll be reducing energy usage and keeping cooling and heating costs down all year round.
